Knowing life matters.

Acadian Federal Resources combines the unique expertise and capabilities of the diverse group of Acadian Companies' divisions to create customized solutions for the federal government.

Acadian offers more than five decades of proven experience in ground and air medical transportation, prehospital care, at-home healthcare, medical response, staffing, security, medical infrastructure, industrial health, safety and environmental services, commercial security and video analytics, charter flight services, and world-class EMS education.

Acadian Federal Resources specializes in developing innovative and proven solutions designed to assist federal projects. By integrating our vast array of our divisions' competencies, Acadian Federal Resources crafts highly customized, vital solutions to government agencies.

Knowing life matters.

Medical Services and Infrastructure

**Medical Staffing · Medical Equipment and Supplies · Occupational Clinics
Field Hospitals · Case Management · Medical Direction · Medical Training
Preventative Screening · Wellness Program Management
Home Medical Care · Behavioral Health Services**

Acadian has over 50 years of experience in Emergency Medical Services (EMS). Our core values of compassion, excellence, and integrity have given us a valued place of trust among the communities and clients we serve. By expanding our customized medical resources to federal agencies, Acadian can offer expert solutions on a national scale.

When the COVID-19 pandemic reached the United States, Acadian quickly adapted and provided medical staff and supplies, testing and vaccination centers, field medical facilities, medical direction and case management services.

Today, Acadian offers federal agencies a robust suite of medical services designed to meet diverse healthcare needs efficiently and effectively. With expertise in medical staffing, we can offer access to skilled personnel capable of delivering high-quality care. Through experienced recruiting and

specialized training, we're confident our personnel will become an intricate part of your team, providing services that further contribute to safety, health, and operational efficiency.

Our personnel and resources can be deployed to support emergency and critical care, either local or in transport, and using state of the art medical equipment. We've also developed extensive solutions to support preventative medical care through wellness programs, occupational health consulting, and in-home care. Acadian stands ready to deliver any logistical needs around implementing and sustaining these services.

Through comprehensive case management, Acadian facilitates coordinated healthcare delivery, optimizing resources and patient outcomes. We also offer medical direction, upholding clinical standards and protocols across services. Acadian also provides

medical training, empowering federal healthcare professionals with the skills and knowledge needed to excel in their roles.

Lastly, Acadian has the experience and resources to offer a wide range behavioral health services, including mental health programs and staff, as well as social workers for family and community programs.

As a Commission on Accreditation of Ambulance Services (CAAS)-accredited company, Acadian has earned the EMS industry's gold-standard seal of approval. In contrast to competitor programs which often require employees to travel for occupational healthcare, Acadian can provide on-site clinical service. Our decades-long, award-winning place in multiple industries gives us the expertise required to provide medical solutions that are unavailable from other organizations.

Medical Transportation

Medical Ground Transportation · Medical Air Transportation
Executive Aircraft Charter Service

Acadian began operations in 1971 with two ambulances and eight medics covering 279 square miles of rural Louisiana. Our service area features a diverse geography of rich swamps, bayous and marshlands, making quick response by ground a difficult task. As a result, Acadian launched a medical air division in 1981.

Today, our ambulance division provides highly skilled medical care to more than 25 million residents over 57,000 square miles in Louisiana, Mississippi, Texas, and Tennessee. Acadian's medical air fleet flies more first-response air missions than any other air medical service in the United States. Our fleet of more than 650 ambulances, EC-135 and 145 helicopters, and Beechcraft King Air turboprops and Bombardier Learjet 45 aircraft are all equipped with advanced life-saving equipment and staffed by expert flight paramedics, nurses, drivers and pilots. Acadian transports approximately 700,000 patients and travels 30 million miles each year, enough to circumnavigate the earth 41 times each day.

Acadian's ground operations are accredited by CAAS and our rotor-wing air operations are accredited by the Commission on Accreditation of Medical Transport Systems (CAMTS), signifying that Acadian sets the gold standard determined by the medical transport industry. Acadian Companies is proud to be one of the very few ambulance services in the nation to hold both CAAS and CAMTS accreditations.

Acadian has been recognized as one of the nation's best emergency medical service providers. The use of innovative technology, stringent medical protocols, and exceptional high standards has earned the company numerous honors and led us to become one of the most respected and largest employee-owned medical providers in the nation.

Home & Community Healthcare Services

In-Home Medical Care · Behavioral Health Services

Mobile Medical Care, Equipment & Personnel · Medical Staffing

Medical Training · Field Hospitals

As the healthcare landscape of our nation continually changes, Acadian has pioneered new and innovative delivery models. Our medical and health services provide compassionate acute and non-acute healthcare, operated through committed partnerships with health plans, accountable care organizations, at-risk healthcare providers and health systems.

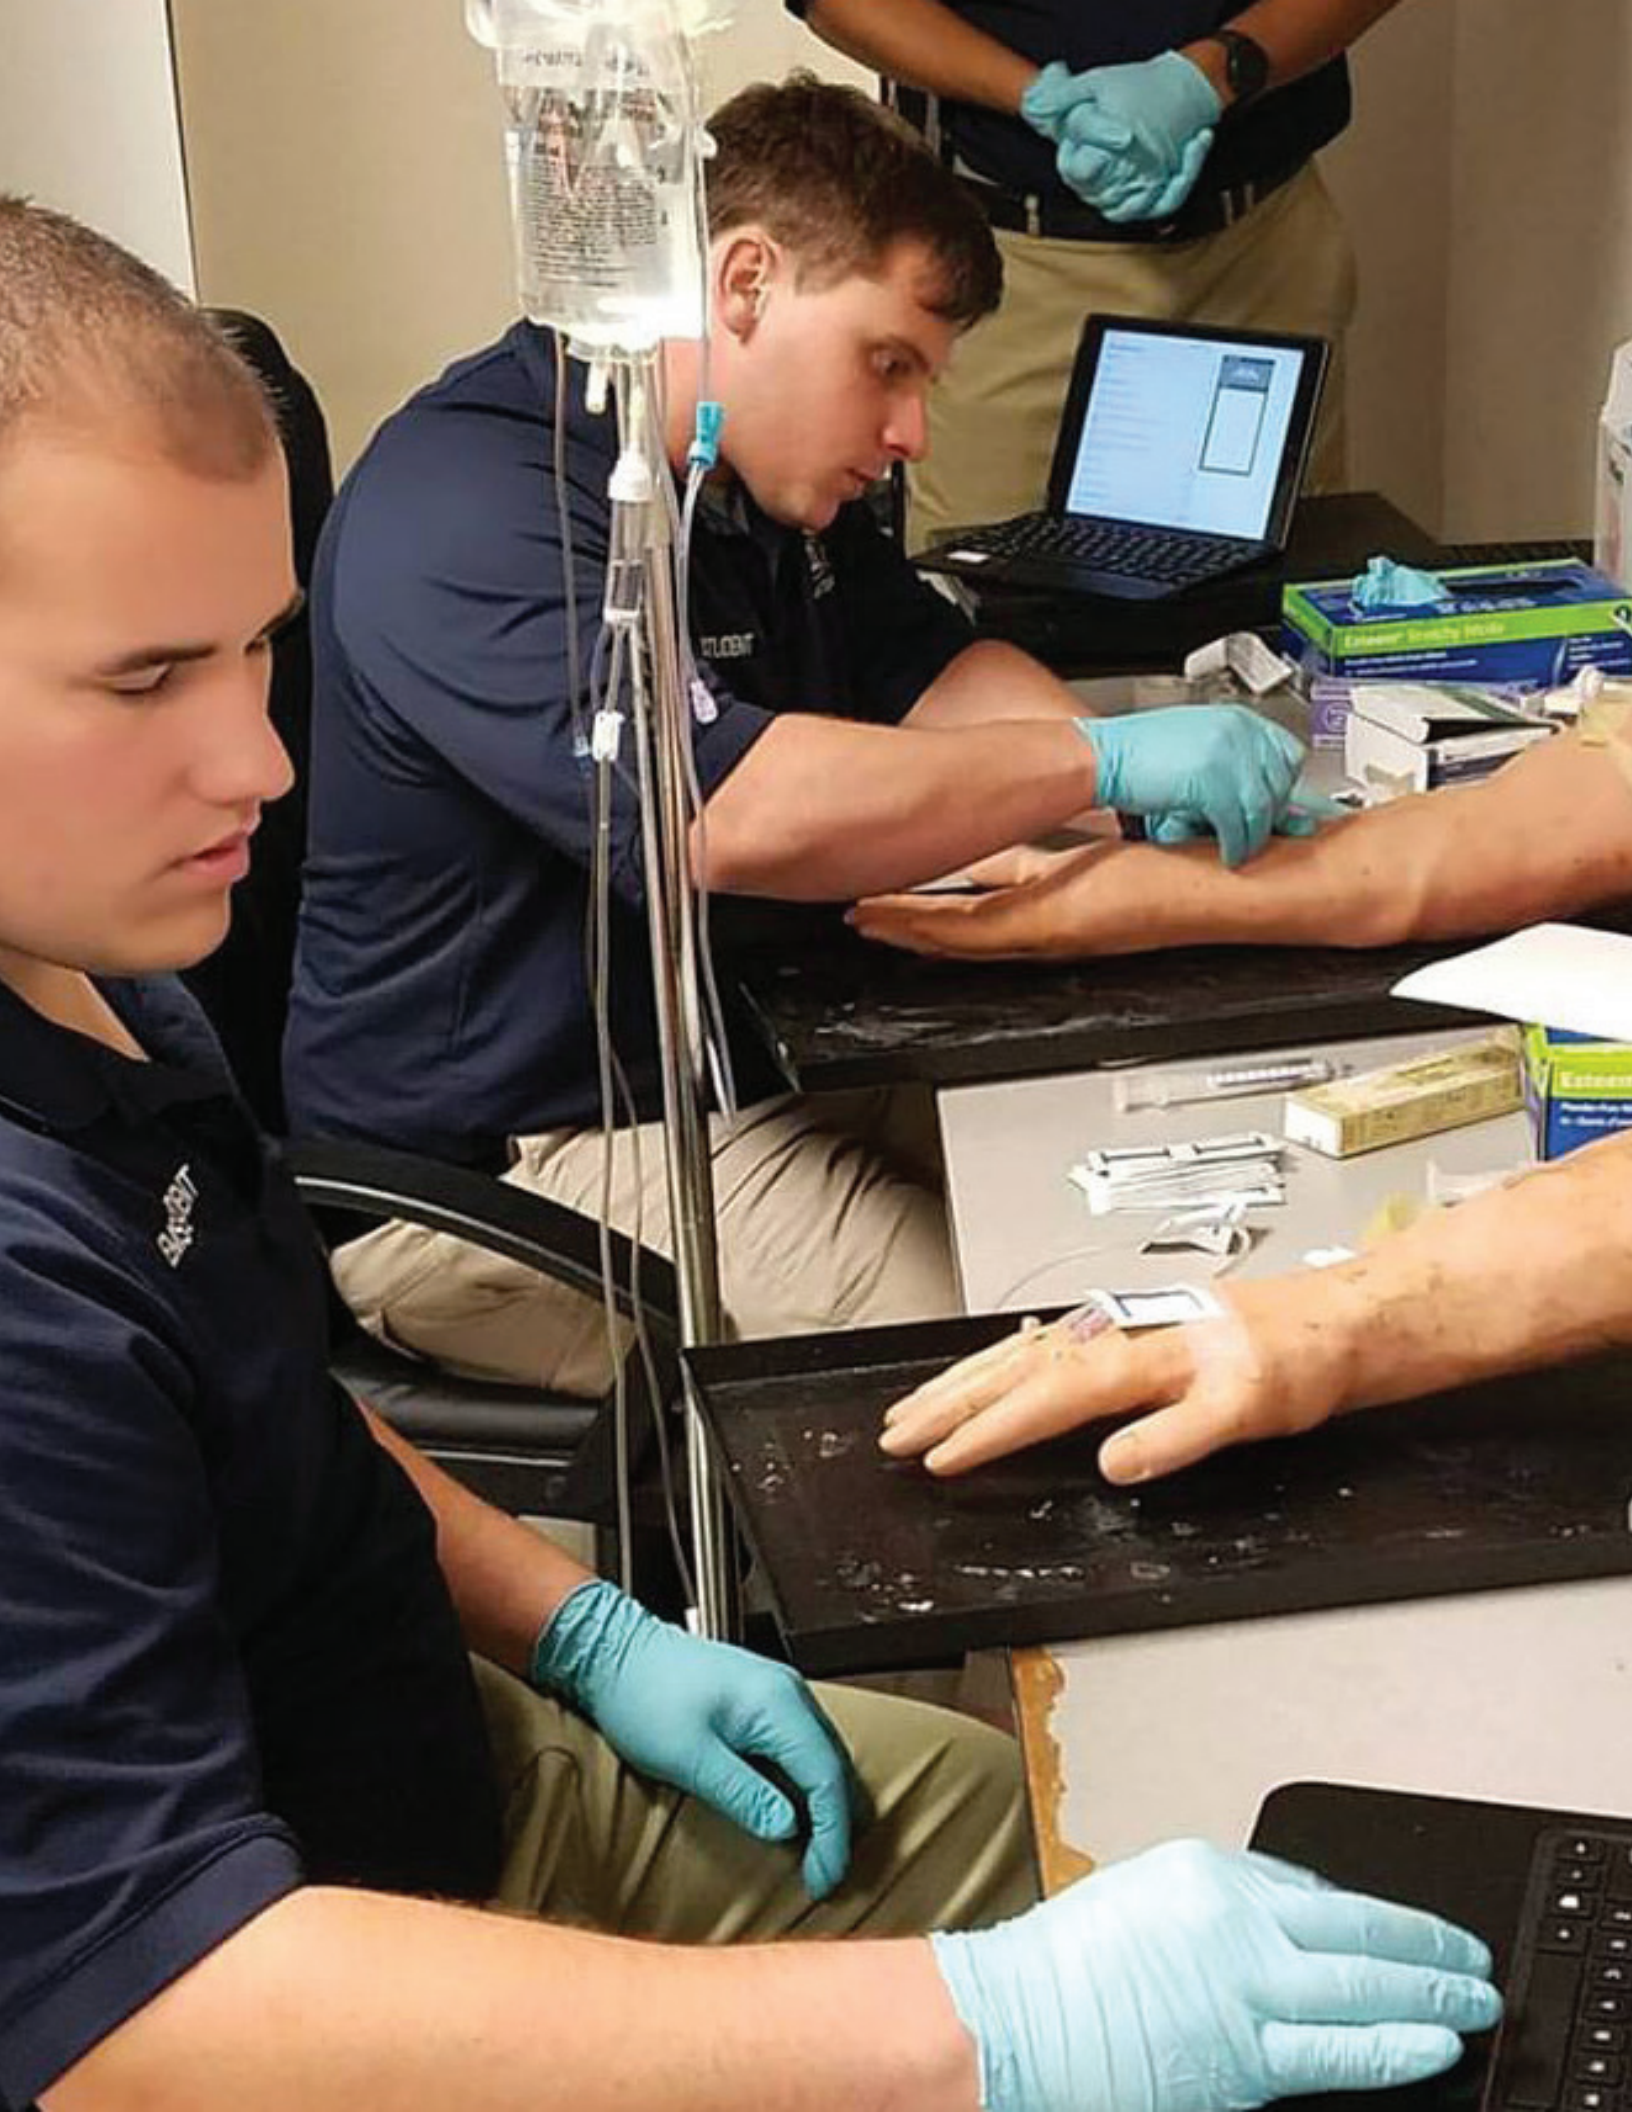

Our mobile healthcare team members arrive at a patient's location with the knowledge, skill, and equipment to act as our partner's eyes, ears, and hands. Through 24/7/365 consultation with physicians, we are able to quickly and properly treat many non-emergent injuries or illnesses, reducing a patient's need to visit a clinic or emergency department.

Acadian is ready to build, staff, and supply medical facilities across the country. Our hospitals provide portable buildings, specialized equipment, medical supplies, medical and administrative staffing, along with hospitals and ER managers.

By working collaboratively with our partners to offer personalized medical solutions for their communities, we improve patient satisfaction, care coordination, and achieve quality patient health outcomes reducing total cost of care.

Acadian

Medical Education

Medical Training · Medical Certification · Military Health Training
Continuing Education · Hybrid Learning

As a recognized leader in EMS, Acadian's in-house education department has often been asked to provide training for other EMS and government agencies.

With the expansion of our educational capabilities, Acadian launched the National EMS Academy in 2003. Fully accredited by the Commission on Accreditation of Allied Health Education Programs (CAAHEP), the academy collaborates with South Louisiana Community College (SLCC) and Texas A&M Engineering Extension Service (TEEX) to educate Emergency Medical Technicians (EMTs) and paramedics for agencies across the United States.

The National EMS Academy offers entry-level, continuing education and refresher courses for a number of EMS career paths. Hybrid EMT and paramedic programs combine online instruction and exams and in-person skills training, allowing students to have more flexibility in pursuing their goals.

As an authorized American Heart Association training center, the academy provides cardiopulmonary resuscitation (CPR) and emergency cardiovascular care courses year-round.

As a leading resource for EMS professionals who seek excellence in educational offering, the academy strives to produce highly effective curricula and teaching resources while committing to quality research in medical education.

Safety Management

On-site Safety Personnel • Health, Safety & Environmental Consulting
Industrial Hygiene • Confined Space Rescue

In the early 1980s, oil and gas companies working in the Gulf of Mexico called upon Acadian to respond to offshore emergencies. Understanding the industry needs, Acadian pioneered the placement of medics on remote and offshore installations, adapting our services from helping injured workers to proactively preventing incidents and illness.

Over time, the division's offerings greatly expanded to offer a comprehensive range of services to address various safety and environmental needs, catering to industries and organizations requiring specialized support.

Today, Acadian offers on-site safety personnel that ensure a proactive approach to safety management, with skilled professionals available to oversee and enforce safety protocols. Additionally, our health, safety, and environmental consulting services offer expert guidance on compliance, risk assessment, and mitigation strategies, enabling clients to maintain a safe and compliant workplace environment. They are equipped and available to address your agency's relevant challenges and concerns, while also providing education and awareness to secure an accident-free environment on the job.

Acadian's expertise in industrial hygiene encompasses air monitoring and exposure assessments, crucial for identifying and mitigating potential hazards in the workplace. Our confined space rescue teams are equipped to execute swift and efficient rescue operations, prioritizing the safety of personnel while still ensuring efficient site operations.

Overall, Acadian's holistic approach to safety and environmental services ensures clients receive comprehensive support tailored to their specific needs, while adhering to our mission of protecting workers and the communities they work in.

Security Solutions

**Security Systems · Fire Systems · Video Surveillance · Video Analytics
Access Control · Intrusion Detection · Remote Fire Detection & Suppression
GPS Fleet Management · Vehicle Telematics · Asset Monitoring
Firearm Detection**

Acadian began providing wholesale security alarm monitoring throughout the U.S. in 1991. The development of these services eventually led to the creation of UL Listed and The Monitoring Association Five Diamond Certified monitoring centers capable of monitoring security, fire, intrusion, video, access control, temperature, medical alerts and vehicle telematics.

In 2014, Acadian expanded to include corporate security equipment sales and installation. Acadian Federal Resources now caters to a wide range of verticals, including industrial, federal, educational, heavy machinery, automotive and many more. Leveraging our extensive industry experience, we provide robust NDAA compliant solutions tailored to the individual needs of each client. Our expertise lies in assisting companies and federal organizations with loss and theft-prevention strategies, ensuring the security of client investments and assets, safeguarding inventory, and optimizing operational efficiency, allowing our federal clients to concentrate on core program management.

With a commitment to state-of-the-art innovation and exceptional customer service, Acadian serves as a comprehensive security solutions provider, offering world-class services.

Disaster Response

Mobile & Temporary Medical Facilities

Emergency and Non-Emergency Medical Transportation & Staffing

Medical Equipment & Supplies · Security Services · Video Surveillance

Safety Services · Asset Tracking · Industrial Hygiene

As Hurricane Ida's projected path threatened the Southeastern Louisiana coast in late August of 2021, Acadian's team answered the call to duty. Our Emergency Response Operations Center (EROC) team mobilized to coordinate incoming evacuation requests while our operations and support teams implemented plans to protect community buildings, vehicles, and personnel. We worked under state contracts and Federal Emergency Management Agency (FEMA) deployments using our resources to safely perform over 800 evacuations from nursing homes, assisted living facilities, private residences and hospitals. With the challenges of the COVID-19 pandemic, our teams focused on the mission. Acadian added numerous hurricane strike teams to assist with medical testing, transport, and hospital space overflow. During the storm, our qualified medical teams sheltered with first responders to remain readily available for the community at risk.

Following the storm, many of our team members worked for several days before leaving to survey their personal property damage. They were needed to help the community and answered the call. Our teams exemplified "The Acadian Way", answering the call of the community with compassion and integrity.

Today, Acadian Federal Resources is prepared to provide emergency response services for operations across the country, with an expanding international presence. Our expansive capabilities include: medical safety, and logistics staffing; utility infrastructure; air and ground transport; supplies and equipment for medical facilities; security and asset tracking; and safety and logistics management. Acadian services have been instrumental in the operations of mass casualty incidents, storm recovery efforts, migrant intake facilities, and more. Our personnel are trained to provide the most effective care possible whether they are operating from brick and mortar facilities, field hospitals, or in mobile strike teams.

Acadian continues to evolve, becoming one of the nation's premier providers of incident and disaster response services. We are confident we can create a solution to fit any mission.

Veteran & Military Healthcare Services

In-Home Medical Care · Behavioral Health Services

Mobile Medical Care, Equipment & Personnel · Medical Staffing

Medical Training · Field Hospitals · Medical Transportation

Acadian is positioned to deliver a suite of specialized services to veterans and the military, addressing their unique healthcare needs with efficiency and care. Through in-home medical care, Acadian ensures that veterans and military personnel have access to quality healthcare no matter their location, providing personalized treatment plans tailored to their specific requirements. Additionally, our behavioral health services offer vital support for veterans and military members facing mental health challenges, fostering resilience and recovery through comprehensive care and counseling.

The flexibility of our mobile medical care, equipment, and personnel allows for deployment to remote locations, ensuring access to critical healthcare services even in challenging environments. Our medical staffing solutions provide the availability of skilled professionals, including physicians, nurses, and specialized health professionals, to meet the diverse healthcare needs of veterans and military personnel effectively.

Acadian's commitment to excellence extends to medical training, equipping healthcare providers with the latest skills and knowledge to deliver high-quality care to veterans and military members. Furthermore, our expertise in establishing and managing field hospitals enables rapid response and effective triage during emergencies or deployment scenarios, ensuring that veterans and military personnel receive timely and comprehensive medical care in any situation.

Employee Stock Ownership Plan (ESOP)

In 1993, Acadian Companies instituted an Employee Stock Ownership Plan (ESOP), giving employees the opportunity to own private shares in the company. Our employees currently own approximately 80% of Acadian stock.

A key benefit of this plan is that our employees truly are owners and, therefore, more invested in the work they do. Ownership gives employees a sense of pride, which strengthens our foundation and promotes continued growth.

Acadian Companies and its employee-owners have earned many awards from the National ESOP Association and its Southwest Chapter.

A Proven History of Response

Acadian Ambulance Service began operations in Lafayette, Louisiana, on September 1, 1971. Since then, our company has expanded to include diverse divisions that share a spirit of innovation and contribute to our mission of Knowing Life Matters.

Acadian Ambulance Service, Acadian Air Med, Executive Aircraft Charter Service, Safety Management Systems, National EMS Academy, Acadian Total Security, and Acadian Health comprise Acadian Companies, and together, we have more than 5,300 employee-owners.

Acadian Companies has remained at the forefront of using advanced technology and stringent medical protocols and training. We have accomplished many notable "firsts" in our storied history.

We were the first ambulance service to formalize training for EMTs and paramedics. In 1976, the National Registry of EMTs adopted our IV training program and began using it nationwide.

In 1989, we partnered with the University of Southwestern Louisiana (now University of Louisiana at Lafayette) in the first scientifically controlled study of an external pacemaker.

Our company has also led the way in the use of technology. We were granted the first Federal Communications Commission (FCC) license to transmit electrocardiogram (EKG) telemetry from a remote location to a hospital.

In a partnership with the National Aeronautics and Space Administration (NASA), we were the first to use a satellite to establish communications between medics on offshore oil rigs to hospitals onshore.

We became one of the first to launch a telemedicine program, allowing physicians at a computer terminal in an emergency room to view high-resolution video images transmitted from paramedics offshore.

The Acadian story is one of dedication, perseverance, resilience, caring, and compassion.
